Subcategory	Locking Carabiners

Am'D

The Am'D asymmetrical aluminum carabiner has a D shape best suited for connecting a belay system or for holding equipment. Its ergonomics and Keylock system facilitate manipulations, even when wearing gloves. The Am'D carabiner is available in three locking system versions: manual SCREW-LOCK system, or automatic BALL-LOCK and TWIST-LOCK systems.

Short Description D-shaped locking carabiner for attaching devices to a harness

Selling Points

- Great functionality, thanks to its capacity and dimensions:
 - efficient shape for use on either end of the carabiner (belay systems)
 - carabiner can hold a large quantity of equipment
- Good handling and ergonomics:
 - D shape for good handling
 - shape designed for gripping with gloves on
 - Keylock system to avoid any involuntary snagging of the carabiner
- Available in three locking systems, each for different situations:
 - SCREW-LOCK: occasional use, dirty environments
 - BALL-LOCK: frequent use with practical automatic locking; secure use with triple-action opening
 - TWIST-LOCK: specific use when quick opening is key (e.g. at the end of a lanyard) and when connecting a GRIGRI to the harness

Specification

- Material(s): aluminum
- Certification(s): CE EN 12275
