TOP CROLL®

The TOP CROLL chest harness transforms AVAO SIT, AVAO SIT FAST, ASTRO SIT, FALCON, FALCON ASCENT, FALCON MOUNTAIN, and SEQUOIA SRT sit harnesses into full-body harnesses for work at height and rope access. The padded shoulder straps are widely spaced to reduce neck chafing. The TOP CROLL chest harness helps distribute the load over the shoulders when the waistbelt is loaded.

Putting the harness on and taking it off is easy with the FAST opening buckle on the shoulder strap. The thin, sliding strap provides more freedom and ease of movement.

The TOP CROLL chest harness connects via girth hitch to a plastic loop on the back of the harness.

Short Description Chest harness for sit harness, with integrated CROLL L ventral rope clamp

Selling Points

- Transforms AVAO SIT, AVAO SIT FAST, ASTRO SIT, FALCON, FALCON ASCENT, FALCON MOUNTAIN, and SEQUOIA SRT sit harnesses into full-body harnesses for rope access work that requires rope ascent, using an integrated CROLL L ventral rope clamp
- Comfortable construction:
 - Widely spaced shoulder straps reduce neck chafing
 - Thin, sliding straps provide more freedom and ease of movement
 - The entire contact zone uses contoured foam and is lined with breathable material, making it more comfortable to work and move around
- Easy to put on:
 - Connects to a loop on the back of the harness via girth hitch
 - Connects directly to the gated attachment point on the front of the ASTRO SIT harness, or simply with a locking or semi-permanent connector on other sit harnesses
- Convenient adjustment system:
 - FAST opening buckle on the left shoulder makes the harness easy to put on and take off
 - DOUBLEBACK self-locking buckle on the right shoulder with anti-slip device, for easy adjustments that don't slip
 - Velcro strap can be adjusted up or down and positioned on the left or right side to hold an ASAP'SORBBER energy absorber
 - Lanyard connector parking can be added on the shoulders for fall-arrest lanyards (available as an accessory)

Specification

- Sternal attachment point: Attachment for a fall-arrest system
- Certification(s): CE EN 361 and CE EN 12841 type B (with ASTRO SIT, AVAO SIT, AVAO SIT FAST, FALCON, FALCON MOUNTAIN, FALCON ASCENT, SEQUOIA SRT sit harnesses)
- Rope diameter compatible with the CROLL L rope clamp: 10 to 13 mm
- Material(s): Nylon, polyester, aluminum, steel
